

What ever happened to Freee enterprise? I don't have XM radio traffic news in my area, but hope to some day! I could use the local news channels on the AM or FM bands to get the information - but have to listen to so many advertisements that it is not worth my effort. I pay for a subscription to XM Radio to avoid advertisements. If they could provide me with traffic information then that would be a service I would recieve as part of my payment to them - it has nothing to do with broadcast radio.
